Compared to metal, glass or even ceramic, the Geberit Setaplano shower surface is pleasantly warm and silky-smooth to the touch – creating a contemporary sensation of comfort for your wellness bathroom.

■ GEBERIT

# Touch it. Love it.

Geberit shower surface Setaplano

# Clean design. Optimum hygiene.

## Design quality

Clear lines – clear benefits: the Geberit shower surface Setaplano is made of state-of-the-art, high-quality solid surface material. Its non-porous surface with a silk-matt appearance ensures optimum hygiene, and its robustness and resistance make a strong impression. Solid surface material also boasts exceptional non-slip properties.

## Shower comfort

The drain positioned at the side is a clever detail that provides more freedom to move around and creates shower comfort without water accumulating.

## Hygiene benefits

Thanks to the edge-free design, there is nowhere for dirt to collect. The cover can be simply lifted off, revealing a comb insert that prevents clogging and can be removed easily for cleaning.

# Precise. Safe. Easy to install.

In the Geberit shower surface Setaplano, several components come preassembled. The sealing foil is also integrated at the factory. This ensures outstanding safety for the plumber and the customer alike.
